

**APPLICATION:**

Librostik D-25 is a dispersion adhesive based on special dispersion. It is used in the packing industry for the manufacture and assembly of composed boxes made from lacquered and/or printed cardboard. It is certificated for use in the food industry.

**PACKAGE:**

20kg

**COMMENT:**

White colour, dilute by water, transparent, elasticity film

---

**APPLICATION:**

Librostik D-20/S1 is a dispersion adhesive based on polyvinyl acetate dispersion. It is used for the manufacture of spiral paper wrapping material and for the bonding of unprinted and unacquered paper and cardboard. It is certificated for use in the food industry.

**PACKAGE:**

20kg, 50kg

**COMMENT:**

White colour, dilute by water, transparent, poorly elasticity

# INDUSTRIAL ADHESIVES GRAPHIC INDUSTRY

**APPLICATION:**

Librostik D-26/1 is a dispersion adhesive based on special dispersion. It is used in the graphic industry for manual and machine bonding of laminated surfaces with paper of different gramme-weights and quality (manufacture of laminated composed boxes, folders, bags and similar). As the bonded joint is constant at low temperatures as well (-40°C), Librostik D-26/1 may be used for bonding of cardboard packing material intended for the storage of victuals in refrigerators. It is certificated for use in the food industry.

**PACKAGE:**

5kg, 18kg

**COMMENT:**

White colour, elasticity, permanently sticky film, dilute by water

**APPLICATION:**

Librostik D-23/1 is a dispersion adhesive based on special dispersion. It is used in cold lamination of toned powdered prints and for the wrapping of plastic foils to porous and printed surfaces.

**PACKAGE:**

20kg

**COMMENT:**

White colour, transparent, elasticity

---

**APPLICATION:**

Librostik D-23 is a dispersion adhesive based on special dispersion. It is used in the manufacture and bonding of composed boxes made with lacquered and printed cardboard; for inserting book notepads in PVC covers; the manufacture of notepads with NCR and AC paper and for the bonding the plastic foils to paper and cardboard. It is certificated for use in the food industry.

**PACKAGE:**

5kg, 18kg

**COMMENT:**

White colour, elasticity, cloudy film, dilute by water

# INDUSTRIAL ADHESIVES GRAPHIC INDUSTRY

**APPLICATION:**

Librostik D-27 is a dispersion adhesive based on polyvinyl acetate dispersion. It is used for hardback and paperback bookbinding, and for different bonding of paper and cardboard where a great elasticity of joints is required. It is certificated for use in the food industry.

**PACKAGE:**

5kg, 18kg

**COMMENT:**

White colour, strong and elasticity film, dilute by water

---

**APPLICATION:**

Tigrostik LM-031 is a thermoplastic adhesive based on special resins. Tigrostik LM-031 is used for bonding of PVC foil to cardboard (blister and skin packaging).

**PACKAGE:**

5kg, 16kg, 20kg

**COMMENT:**

Application with rollers, thermolacquer
